Final Project Presentation & System Demonstration

INDIVIDUAL ASSESSMENT • PHYSICAL FORMAT • 10 MARKS

briefing

THE FORMAT

15 minutes per student

A clear sequence: your demonstration first, lecturer verification afterwards.

10 MINUTES

STUDENT-LED

Project overview • End-to-end system workflow • Engineering decisions

5 MINUTES

LECTURER-LED

Selected functionality verification • Technical questions

STUDENT-LED / FIRST 10 MINUTES

Tell the story through your working system

Focus on the solution and demonstrate a meaningful workflow—not a tour of screens.

01

PROJECT OVERVIEW

Problem, purpose, final solution and principal technical characteristics.

02

LIVE SYSTEM WORKFLOW

Demonstrate a substantial end-to-end process using the final submitted system.

03

ENGINEERING DECISIONS

Explain key architecture, technology and implementation choices, with reasons.

LECTURER-LED / FINAL 5 MINUTES

Verification happens after your demonstration

Your planned presentation will not be interrupted.

01	**Functionality**	A capability chosen from your declared Final Release Scope.
02	**Robustness**	Relevant validation, business rules, alternative flows, access control or errors.
03	**Technical defence**	Questions on code, architecture, testing, limitations or implementation.

Be prepared to demonstrate any functionality you declared as part of the final release.

ASSESSMENT RUBRIC

How the 10 marks are allocated

Most marks assess working functionality, verification and technical understanding.

Project overview and technical communication	1
Principal end-to-end system workflow	2
Lecturer-selected functionality and robustness verification	4
Explanation of engineering decisions	1
Technical understanding and defence	2
TOTAL	**10**

Be ready on the day

Physical individual sessions, with 15 minutes allocated to each student.

BEFORE YOUR SLOT

- Have the final system ready to run.
- Prepare a concise, coherent demonstration.
- Be ready to explain and defend your own implementation.

DISCUSSION

Can students voluntarily observe their colleagues' presentations?
